

**Dr. Ineka Whiteman** is the Head of Research & Medical Affairs for the BDSRA Foundation. She is an internationally trained neuroscientist (Oxford University, UK; Colorado State University, USA; Sydney University, Australia), and holds a PhD in Medicine from the University of Sydney, Australia. Ineka has a research background in the cell and molecular biology of dementia, in addition to professional experience in government and the biotech industry, where she held senior medical affairs roles in one of the world's leading biopharmaceutical companies.

Ineka has worked in the Batten disease field for over four years, leading Research and Medical Affairs for BDSRA Australia and more recently supporting the Beyond Batten Disease Foundation. Now engaged with all three organizations, Ineka is passionate about working together with families, clinicians, researchers, industry and advocacy partners, to bring hope and to improve lives and outcomes for individuals and families affected by Batten disease.
