

Setting Research Priorities for Batten Disease

(Neuronal Ceroid Lipofuscinoses)

In partnership with the BDSRA Foundation

We invite you to participate in the phase 2 survey dissemination.

Using feedback from the phase 1 survey, we have generated a list of research questions for phase 2.

This anonymous survey will allow stakeholders to review the list and select their top 10 questions.

Your input will help drive research priorities and investment in Batten Disease. We encourage you to share the survey link with additional stakeholders.

How can you contribute ?
